

Cherry Street
Florida

Apartment, south elevation

Hotels, west elevation

Project: Mixed Use

Size: 800,000 approximate GSF

Special Features: The proposed plan for this project calls for two eight-story hotels and a 13-story multi-use building. Each hotel will contain 125 rooms, multi-function facilities and a restaurant. The multi-use building is planned with 20,000 SF of ground floor retail, six parking levels and seven residential levels. The residential component currently allows for 220 apartments with a large pool and amenity deck located on the seventh floor.

Project Details: CDP is providing master planning and architectural design services
