

BVG Inc. Office Renovation
Tampa, Florida

Project: Custom office renovation

Special Features: This luxurious ninth floor suite was given a crystal clear facelift. A window wall acts as a barrier between the conference room and the main lobby. The contrasting light and dark wood tones give the office a rich feel while the mirrors and glass walls give the illusion of space. A custom-made reception desk has storage cupboards and recessed lighting. This office also has a sales lounge for the company's many real estate transactions.

Project Details: CDP provided architectural renovation and complete interior design services.
